Picking up the line sample bag will constitute a fishing day for that team. Documented mechanical or electrical failure which would compromise the safety of the anglers and/or crew, if detected before the vessel clears the inlet breakwater, will allow the vessel to return the observer to the dock and not be considered a day of fishing, or obtain another vessel to continue the day of fishing. After clearing breakwater it will be considered a day of fishing for the vessel. In the event of mechanical failures the vessel may return to transfer crew to another vessel to finish that day of fishing.

    1. A double line must consist of the actual line used to catch the fish.
    2. Double lines are measured from the start of the knot, braid, or splice, making the double to the furthestmost end of the knot, splice, snap, swivel, or other device used for securing the trace, leader, lure, or hook to the double line. The double line shall be limited to 15 feet. The combined length of the double line and leader shall not exceed 20 ft., this includes the hook.
  - C) **LEADER:** The use of a leader is not required. If one is used it must meet the following specifications: The length of the leader is the overall length including any lure, hook arrangement or other device. There are no regulations regarding the material or strength of the leader. The leader shall be limited to 15 ft. The combined length of double line and leader shall not exceed 20 ft, this includes the hook.

15. PENALTY: Any boat disregarding either rule 13 or 14 which is reported to the Rules Committee will have the last two fish caught deducted. Anglers will not be penalized since this rule involves operators of boats only. Operators violating this rule may be penalized only if another operator files a protest in writing.
